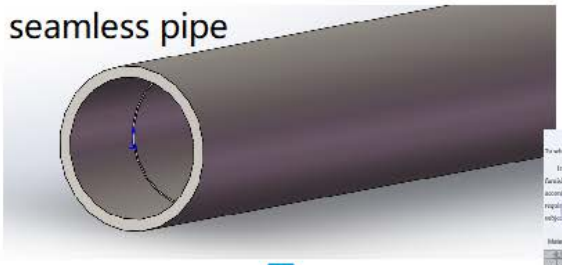
FT-ROLLER

Steel Roller Prodution Process

Material: 1020, C45, 4340, S355j2, S.S.etc.

seamless pipe

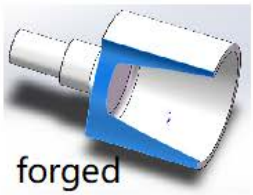


annealing if necessary

(boring inside tube)

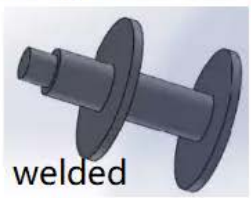
turning outside and
inside at both ends

static balancing



forged

interference assembly
0.15% magnitude of interference



welded

welding

turning

grinding

dynamic balancing

coating
(paint, chrome etc.)

final inspection

packaging
